

AnoPix™

AnoPix™ is a proprietary, patented process where an image is encased in the anodization process. This process combines all the advantages of anodized aluminum and inkjet technology to produce a unique custom solution. The design options are varied and our engineers can assist in final designs and tooling.

Anodized aluminum plate samples

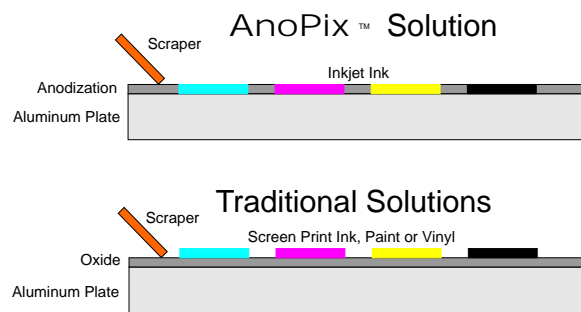

Photo Quality
and Detail

AnoPix™ will protect the image when the surface is scraped because the image remains in the surface of the aluminum. However with the traditional method the image would be removed.
