

HSP

Hard Surface Performance
Sublimation Ink

Uniquely designed for hard surface applications.

Hard Surface Performance (HSP)

HSP ink is a newly released ink set for enhanced performance on non-textile substrates. This ink set has been uniquely formulated to provide superior performance with non-textile substrates.

HSP has substantive attraction to thin film applications.

This means better adhesion, bonding color gamut and UV stability.

APPLICATIONS

TILE
METAL
STONE
CERAMICS

Westar Systems supplies sublimation ink specifically formulated to work with wide format printers. The ink set has proven to be stable over many years of use with superior run ability characteristics. Competitive ink sets have undergone significant formulation and even colorant changes over the years. The Westar ink set is for those customers who want stability, vibrancy, consistency, color strength, longevity and light fastness.
