JETCOL Sublimation Paper

Significant Ink Savings

Jetcol HTR is designed to release the ink during the transfer process, yielding a savings of 30% to 50% on ink costs compared to other ink jet papers.

Exceptionally High Transfer Yield

Jetcol HTR transfer paper up to 95% of the ink leaves the paper during the sublimation process.

Increased Color Gamut

The high transfer yield creates the ability to reach deep, saturated colors on the end substrate for deeper, truer color reproduction compared to normal ink jet paper.

Fine Detail Printing and Superb Uniformity

Extensive continuous quality checks ensure superior quality and consistency of Jetcol HTR papers.

Jetcol HTR

Designed to release ink at transfer, the coating on Jetcol HTR acts as a barrier, keeping inks on top.

Jetcol HS

Engineered to absorb ink in the top coating, jetcol HS offers a fast dry time and high transfer yield.

Other Paper

Standard transfer paper absorbs the ink at printing trapping it in the top coating, which results in lower yields.

BUY 1 roll of paper and get 1 more FREE

Purchase limited to new paper customers, quantities and sizes are limited, and offer expires on Jul 31, 2015
